seele's unique design for residential buildings

seele, Inc. in New York is increasingly involved in private projects for the upmarket segment.

New York, 12 September 2017. Large façades in structural glazing or steel and glass create maximum transparency and breathtaking views. seele's capabilities are extensive when it comes to unique building envelopes. The impressive architecture of major construction projects can also be implemented for private schemes. seele Inc. has already proved this more than once. Several private projects have already been completed, from the modernisation of a penthouse right up to the building of new luxury villas. And what they all have in common is unique glass designs that make them something special.

seele can provide inspiring, timeless designs for interiors, too. All-glass stairs with their minimal fixings appear especially lightweight, and door systems or balustrades in glass blend in perfectly and lead to interior design freedoms that know no bounds.

To complete such projects, seele deploys its full range of services – from consulting and design to fabrication, installation and maintenance. seele's knowledge of feasibility, materials and innovative façade engineering smooths the way to new solutions – incorporating customer requests that initially appear impossible. Currently, seele, Inc. is sponsoring the "Architecture and the City Festival" in San Francisco, where one of the themes this year is residential buildings. The festival takes place from 1 to 30 September 2017.

press release

seele group

The seele group of companies, with headquarters in Gersthofen near Munich, is one of the world's top addresses for the design and construction of façades and complex building envelopes made from glass, steel, aluminium, membranes and other high-tech materials. The technology leader in façade construction was founded in 1984 by master glazier Gerhard Seele and steelwork engineer Siegfried Gossner.

Based on a profound understanding of design and materials, seele provides everything necessary for ambitious one-off designs true to the original ideas of engineers and architects. The seele group offers its building sector and industrial customers a complete package of services, ranging from R&D, individual advice and joint conceptual design right up to the planning, detailed design and construction of their projects. seele's own production plants for technologically challenging designs and the group's own erection crews on site provide a guarantee of the very highest quality "made by seele".

About 1,000 employees work at the seele group's 12 locations around the world, together generating an annual turnover of more than €200 million.

seele, Inc.

The branch in New York is responsible for seele's business in the US-American market. Consulting, design, production, project management, erection and maintenance are among the full range of services offered by this office for the completion of individual projects. The team can call on the services of 150 designers, three production plants and a total of 1,000 employees spread across the whole seele group.
